Name: David Brian Rawlings

Address:

Naples, FL,

Organization: David B. Rawlings, Ph.D. , PA

General Comment

Biofeedback is a useful and efficacious, non-medication, ancillary treatment for many physical and mental disorders. Unfortunately, the pharmaceutical and insurance companies do not want the public to know this. Neurofeedback has also been proven to be extremely useful in treating ADHD. As you may know, ADHD creates considerable difficulties for the patient as well as their significant others and taxes the medical and educational systems.
